EMAIL SECURITY IN THE CLOUD OR ON-PREMISES

INCOMING » OUTGOING » ARCHIVING

Local Cloud » SaaS Managed Email Security on your own premises
» Outgoing Filter » Email Archiving » 5-tier Control » API » Clusterable
» Synchronized » Scalable

In general, spam, malware, virus and phishing attacks are a big threat to web hosts and the majority of companies. Furthermore, in order to preserve their reputation and protect their IPs from becoming blacklisted, organizations, large businesses and web hosting providers need to effectively implement counter measures. SpamExperts solutions can make the difference between an untrustworthy network and a reliable one. Services are available in the cloud or on premises and will instantly protect your network against any spam, virus and malware threats.

Quick Read

Hoster.KZ is SpamExperts' first client from Kazakhstan. The company provides web development, hosting and domain registration solutions since 2004 in the Kazak region. With over 46% of all registered domains in the .kz zone, efficiency and quality of service, competent technical support, and a large fleet of 53 servers, Hoster.KZ is a local industry leader.

Challenges

Before implementing the Outgoing Filtering from SpamExperts, outbound spam was an irritating issue. Reputable IPs were turning into blacklisted ones, thus leading towards negative customer experience feedback and loads of resources wasted on trying to overcome threats. Hoster.KZ had no solution to filter outgoing emails and to protect against spam that was leaving their network. The company was just manually checking all the servers.

Customer profile

Company	Hoster.KZ
Location	Kazakhstan
Industry	IT
Number of filtered domains	5,000 domains Outgoing
Products in Use	Local Cloud, Outgoing Filter, Email Archiving
Website	https://hoster.kz

Implementation

After researching numerous products available on the email security market, Hoster.KZ decided to purchase a subscription from SpamExperts consisting of Outgoing Filtering services for 5,000 domains via Local Cloud. The reasoning behind their decision is due to the excellent quality and great pricing of SpamExperts services. The company implemented the outbound solution in June of 2015.

Benefits

The implementation of SpamExperts solutions has had a positive outcome. Hoster.KZ has noted that they aren't experiencing outbound spam anymore – this has led to a better protection for IPs against blacklisting and an increase in network reputation. The company is saving valuable resources every day, and because threats have been eliminated, they can now focus on bringing more value-added service to their end-customers.

“SpamExperts provides great, and highly affordable solutions. Thanks to their Outgoing Filter services we can now rest assured that our servers' IP reputation is preserved. We don't have to worry about blacklisting anymore, which was our main concern. The Sales and Support assistance we are getting is excellent – the quick response time makes the difference,” says Vladimir Mandrovskiy, Hoster.KZ Head of Technical Support.

Target Reached

“Before choosing SpamExperts, Hoster.KZ had a lot of issues with outbound spam. Now, our support channels aren't as overworked as before and our customers are happy. We are considering a license upgrade that will include more domains,” concluded Vladimir Mandrovskiy.
