EMAIL SECURITY IN THE CLOUD OR ON-PREMISES

INCOMING » OUTGOING » ARCHIVING

Local Cloud » SaaS Managed Email Security on your own premises » Outgoing Filter » 5-tier Control » API » Clusterable » Synchronized » Scalable

Spam, virus, malware and phishing attacks are still a threat to web hosts and most companies, in general. The best defense against them is the deployment of effective counter measures. This is where SpamExperts can make the difference. SpamExperts solutions are deployed in the cloud or on premises and will instantly protect your network against any spam, virus and malware threats.

Quick Read

Openhost provides cloud solutions (dedicated, shared and hybrid) based on Microsoft technologies. The company addresses safety issues and accessibility systems and computer data for professionals (liberal professions, SME, large companies, local authorities, associations etc). The facilities are based in France, highly secure and directly administered by the technical team.

Challenges

Before implementing Outgoing Filtering from SpamExperts, outbound spam was a problem on the company's shared infrastructure due to bad IP reputation. This could affect all of their customers. At that point, they had no solution to filter outgoing emails and to protect against spam leaving their network. Soon enough, the team started searching for an efficient solution for their entire Exchange infrastructure.

Implementation

After researching various products available on the market, Openhost decided to purchase a self-hosted anti-spam cloud solution with both outgoing email filtering for the domains they add to the system. They implemented the SpamExperts outbound solution in

Customer profile

2015 to filter outgoing messages from their dedicated and shared messaging solution based on Microsoft Exchange.

Benefits

The implementation of SpamExperts solutions has had a positive outcome. Openhost has saved time and money and can now focus on bringing more value-added service to their end-customers. Besides saving valuable resources, the implementation of the Outgoing Filter prevented their IPs from being blacklisted. As a result, Openhost now enjoys a better maintained brand reputation.

SpamExperts is an affordable solution that helps us improve the delivery rate. The filter prevents spam messages from getting to the internet and preserves our servers' IP reputation. The support we are getting is really great and the team responds quickly, explained Jordan Roy, System Engineer at Openhost.

Target Reached

Openhost provides solutions based on Microsoft products. One of these is Microsoft Exchange. As a hosting provider, we are very concerned about spam problems which can get very annoying for our customers. SpamExperts is great at preventing spam messages from leaving our network, it preserves the reputation of our servers and improves delivery rate, concluded Jordan.
